

Welcome to About Android

Android Workshop Wrap-Up

This is the final week of the Android Workshop.

We have talked about every setting on the Android phone.

This week we will focus on miscellaneous stuff.

Things to Remember About Android

- Open Source – Anyone Can Modify
- Many Manufacturers – Added Bloatware
- Cell Carriers – More Bloatware
- Updates Not Always the Same

My demonstration phone is a Google Pixel 4a with stock Android, Version 13.

Other manufacturers will have differences in their phone layouts, system settings, look and feel, etc.

Wrap-Up Discussion Topics

- 1) Using the Google Play Store
- 2) Alternative App Stores
- 3) Backing Up your Phone
- 4) Replacement Applications
- 5) Some Tips and Tricks
- 6) Open discussion – How can I make this workshop better?

Alternate App Stores

Many Manufacturers have their own store:

- [Amazon App Store](#)
- [Samsung Apps](#)
- Many Others – Links are often on the device

Sites to d/l APK files (Android Application Kit)

- [GetJar](#)
- [APK Mirror](#)
- [APK Pure](#)

Backing Up Your Phone

Some Options for backing up:

- 1) Make sure backups are on in Settings.
Required for moving data to new phone
- 2) Copy files to local disk with USB – Requires Developer Options be on
- 3) Download Backup program from Play Store
- 4) Back Up individual programs –
[APK Extractors](#)

Some Replacement Apps

Some Tips and Tricks

Next Android Workshop Planned for June 8, 15, 22 & 29
