

## Welcome to the Internet SIG

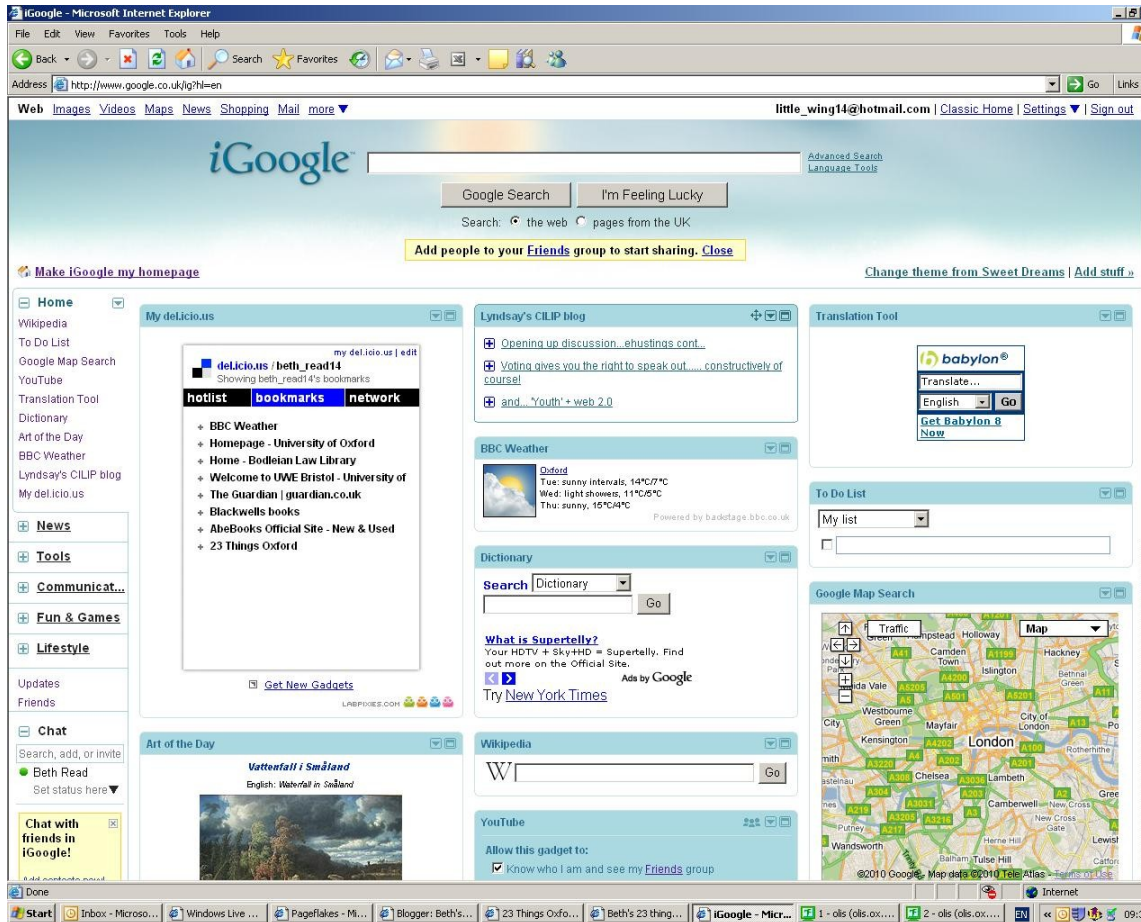

# Make a Personal Home Page

# Discussion Topics

- Remember the iGoogle Portal?
- HTML editors
- Kompozer demonstration
- Make a quick home page
- Using your new home page

# iGoogle 2005-2013

# W3 Schools

HTML Tutorials

# HTML Editors

There are many of them, both paid and free. Most important feature to look for is **WYSIWYG**.

I will be using [KompoZer](#) for this demonstration.

# About Kompozer

- Open Source Software
- Started in 2005
- Last Updated May 30, 2016
- Easy to Use
- WYSIWYG
- Split View Screen

Let's Make A

Browser Home Page

I've made a tutorial of  
everything I've just  
shown you.

You can also make a quick home page with similar attributes.

- 1) Use almost any word editing program. I will demonstrate with LibreOffice.
- 2) This is really not the best method.

# Now the Bad News

- Double Clicking the file you save will open your browser. Then click your link.
- You can make your saved file the home page in your browser. If you have more than one computer, it is a real PITA.
- You cannot use your file from Google Drive, OneDrive, Dropbox, etc.
- The most effective method is to host the file on a web server. There are free ones, but most add advertising.
- Some Internet Service Providers let you host files.
