

# Chrome Browser

Google Chrome is a web browser developed by Google.

It was first released in 2008 for Microsoft Windows. It has been ported to Linux, macOS, iOS and Android.

The browser is also the main component of Chrome OS.

Most of Chrome's source code comes from Google's free and open-source software project Chromium.

Chrome is licensed as proprietary freeware.

Because of this browser's success, Google has expanded the "Chrome" brand name to other products

- Chrome OS
- Chromecast
- Chromebook
- Chromebit
- Chromebox
- Chromebase.

The browser was first released on  
September 2, 2008 for Windows XP.

# Not My Favorite Browser

This month I'll be uploading my presentation notes as a separate file.

They are just short reminders of what I wanted to cover in this presentation.

# What's The Next SIG Topic

**Have you got a topic idea? Want to learn about something special?  
Tell me anytime you see me or contact me online.**
