

First

Talk about creating account. Go through the steps of creating the account

Then select a file to upload.

Talk about the title and what to recommend.

About how you don't want a long title.

You want to make it so you can catch the attention of the watchers.

Using as much details as you can with it.

Also using caps will help a lot with it.

Next talk about the description.

You want to give a brief description of what the video is about.

Then if there was anyone in the video. Most times people will link anything related to them.

Then I would add your links.

Then type the example .

Hey guys welcome to a brand new video and series. Today I'm playing a new game called Ark Survival evolved. In this game your goal is to survive with as long as possible with wild and dangerous dinosaurs chasing after you. In my series have a load of mods. These make the game more fun. Keep watching to see if I survive.

My Discord server: <https://discord.gg/PqdCy7h>

Thanks for watching like and subscribe

Then a thumbnail.

I would make a colorful thumbnail.

Or a thumbnail that featured something that happened in the video.

Make it very catchy. Using something that will catch the watchers attention will give you more views.

Next is playlist.

Talk about what playlist are for and how they can help with organisation.

And how you create a playlist.

Next talk about the audience.

If it something that is geared towards kids. I would select yes. If its geared for everyone i would select no.

Next is the 18 over. If it has gore or something questionable. I would slect 18 if not then i wouldnt.

What this dose is sleects what veiwing type of people you will get to watch your videos.

Paid promotion

Its there to let the veiwer know that the channel has a sponsor for the video.

Tags

They are like twiiter with #something.

Its another type of organisation feature where if videos have it it will be added to a list of videos with the #

subtitiles.

Subtitles are what are under the video description of what you are saying in different languages.

This can get you more views who speak different languages. I would recommend spanish.

Recording date and location.

These give the viewer more information.

Date can tell if a event was happening, And location can tell you where it was located.

Category

This is another organization feature.

So if you have a gaming video it will go under the youtube gaming tab. This will give you more viewers in your videos who enjoy your content.

Comments

This is where people can talk about the video, give suggestions and also the like and dislike feature.

End screens

If you can see an example.

This is where you can link channels and other videos.

Add cards

Where you can add videos that viewers can click on.

Playlist

channels

links

Visibility

Where you can set who can see the videos.

Private is only you and people you add.

Unlisted is it will not show up on your channel feed but will show up in recommended and searching.

Public is where its on your channel feed, Search, and recommended.

Schedule

Is if you want the video to upload at a certian time or date.

After you upload you can still edit the video.

Next youtube studio.

Go through each one and go and you read throug
