!**

Many of the items in today's presentation have been previously discussed.

I hope nobody minds a review.

Discussion Topics

- Browser Safety
- Social Media Safety
- Password Safety
- Personal Data Tips
- Off Line Safety?
- Some Final Links

Browser Safety Tips

Update Your Browser

- Updates prevent many attacks
- Keep your anti-virus updated
- Make sure add-ons and extensions are safe
- Don't click on links you are not sure of
- Make sure your connection is secure
 - 1) HTTPS
 - 2) Better yet – Use a VPN
- Follow your instincts

Consider Using an Anonymous Browser

- [Tor](#)
- [Brave](#)
- [Epic](#)
- [SRWare Iron](#)
- [Comodo Dragon](#)
- [Yandex](#)
- [Tails – Much More Than a Browser](#)

Social Media Safety Tips

- Keep your personal data personal
- Be careful when liking or sharing
- Are your friends really your friends?
- Don't share your passwords
- Avoid posting your location
- Double check links before you click them

Password Safety Tips

- It's YOUR password – don't share it
- Longer is Stronger
- Different sites – Different passwords
- [Test your passwords](#)
- Consider using a Password Manager
- [One of many good videos](#) – 3:30 minutes
- Don't forget the old Underwear Joke

PASSWORDS are like UNDERWEAR

1. Change them regularly
2. Don't leave them on your desk
3. Don't loan them to anyone

Personal Data Tips

Check If You've Been Compromised

- [Have I been PWNED?](#)
- [PWNED Passwords](#)
- [Privacy Rights Clearinghouse – Data Breaches](#)
- There are many other sites that do the same thing. These three I know are safe to use. Check out sites before you use them. You don't want to get hacked while checking to see if you were hacked.

Offline Safety Tips

Offline Things Can Affect Online Safety

- Remember that your phone is a computer. All your data is accessible.
- Guard your equipment. Your online identity is lost if someone steals your laptop.
- Keep informed. There are many websites that report data breaches long before the mainstream news outlets.
- Back up your data in case you get hacked.
