there were any

Internet Search Engines?

A circular, light-colored patch with a stitched border. The text is centered on the patch. The word 'Librarian' is in a serif font, with 'Li' in blue, 'br' in yellow, 'ar' in red, and 'ian' in green. Below it, 'the original' and 'search engine' are in a green sans-serif font.

Discussion Topics

- Search Engine Definition
- Popular Search Engines
- Search Tips You Probably Know
- Search Tips You Might Not Know
- Search Tips I Doubt You Know
- Closing Thoughts

What is a Search Engine?

- A computer program that is designed to search for information on the World Wide Web.
- The search results are generally presented in a line of results often referred to as search engine results pages.
- The information may be a mix of web pages, images, and other types of files.

Popular Search Engines

- 1) Google
- 2) Bing
- 3) Yahoo
- 4) Baidu
- 5) DuckDuckGo
- 6) Yandex

Searching works nearly the same on all engines.
Because it is the most popular, I'll be using Google.

Popular Search Tips

- 1) Be Specific and Wordy
- 2) Use Quotes For Exact Search
- 3) Don't Use Common Words, Punctuation or Capitalization
- 4) Use an Asterisk (*) as a Wild Card
- 5) Use the Minus Sign (-) to Exclude Words
- 6) Do a Specific Site Search (site:????)

Advanced Search Tips

- 1) Use Boolean Search Operators:
AND, OR, NOT, NEAR
- 2) Search for Words In Title (intitle:???)
- 3) Search for Related Sites (related:???)
- 4) Compare Things With vs (great for food)
- 5) Use the Search Tabs
- 6) Use Advanced Settings and Tools

Little Known Search Tips

- 1) Use Keyboard Shortcut (/)
- 2) Use CTRL-E or CTRL-K
(only if address bar search is enabled)
- 3) Search for News Only (news:???)
- 4) Search Within a Range (???..???)
- 5) Stumped: [Change Your Search Engine](#)

Closing Thoughts

- I only discussed some of the most common tips
- Search Engines often change features
- Today's Tips all work in Google.
- They also work in most other Search Engines.
