

Pandemic Got You Stuck At Home?

Getting Bored?

Presentation Notes

- All the sites I'm showing are SAFE – just remember that sometimes sites can change
- All of the downloadable content is Free – no digital rights management blocks
- Most of the sites don't require a log in
- There are lots of links – this presentation will be available for download
- A note on downloading – some sites say streaming only. If it can be streamed, it can be downloaded. I won't be discussing that tonight.

Unfortunately, I have never found any good free magazine download sites. Most of them are some kind of free sample scam.

Use your library card and download a large assortment of magazines from [RB Digital Magazines](#) (formerly Zinnio).

I'm not going to spend a lot of time talking about free music and other downloads. There are tons of sites that can be found by a web search (just add "royalty free") to your terms. I get most of mine from YouTube. I'll add more later when I show you the **Best Download Site Ever**.

Free Images

Image Sites

Like sound sites, there are many places to download free images. Make sure sites you go to include licensing data. On the next slide are a few sites I check when looking for images for my personal web site or some newsletters I edit. I like them because:

- They are all open source licenses (mostly creative commons)
- They have easy to use search functions
- The images are mostly pretty good
